**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 142 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification, as original filed, does not provide support for the invention as is now claimed. The specification does not disclose that the flexible connector comprises a flexible film, and this connector encapsulates a portion of at least one of the receiver assembly, the battery assembly or the microphone assembly as claimed in claim 1.

The specification does not disclose the flexible connector has a tapered shape over a length of the connector as claimed in claim 142.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear if the Applicant is claiming the flexible connector 53 comprising a flexible film 54 for encapsulating a portion of the receiver assembly, the battery assembly or the

microphone assembly or not. It appears that the microphone assembly 40, battery assembly 50, and receiver assembly 60 are encapsulated by the thin capsules 45, 52 and 62, respectively (also see page 18, lines 13-21; page 19, line 15 to page 20, line 2 and figures 5 and 10 as remarked by the Applicant).

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 3, 37, 45, 49, 141 and 143 are rejected under 35 U.S.C. 102(e) as being anticipated by Shennib et al. (U.S. patent 5,701,438).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Regarding claims 1 and 3, Shennib teaches a hearing device that comprises a sealing retainer (43, 70, 190) adapted to be retained in the bony portion of the wearer’s ear canal, a receiver assembly (40, 41, 42, 161, 173) including a receiver, a microphone assembly (14, 162)

Art Unit: 2615

adapted to be positioned medially past the aperture of the ear canal (figures 4, 30), a battery assembly (15, 16), and a flexible connector (46, 50, 51, 52, 53, 57, 58, 59, 120). As shown in the drawings, the hearing device is adapted to be inserted entirely within the wearer's ear canal medially past the aperture thereof for a long-term wear with the battery assembly. Further, Shennib teaches

Regarding claim 37, Shennib teaches the compressible material for the sealing retainer as claimed (col. 9, lines 30-32 and lines 61-63).

Regarding claim 45, as shown in disclosed, the sealing retainer is provided for an assortment of different sizes and shapes to accommodate the dimensions of the ear canal of the individual wearer (figures 3, 4, 11, 18, 32).

Regarding claim 49, Shennib shows the receiver assembly that is adapted to protrude medially beyond the contact area of the sealing retainer (figures 13, 14, 17, 18).

Regarding claim 141, Shennib shows the flexible connector (50) that has a ribbon shape (figures 27-28).

Regarding claim 143, Shennib shows the flexible connector (50) that comprises an electrical wire as claimed (figures 3-4, 20, 23, 30).

***Allowable Subject Matter***

5. Claims 98-100, 111, 116-121 and 123 have been allowed.

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
